01 PROFILE

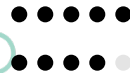

My name is Muhamad Faith Azmi, and I am a student at SMK PLUS PELITA NUSANTARA in Bogor, majoring in Software Engineering. I have a deep passion for technology, which motivated me to choose this field of study. My primary expertise lies in building websites as a Frontend Developer. Alongside programming, I am also drawn to multimedia, particularly video editing and design.

Beyond my current skills, I am eager to explore other areas of technology, including Backend and Android development, with the goal of building well-rounded expertise across multiple fields. I aspire to continuously improve and expand my skill set, aiming to develop a comprehensive understanding of each area I venture into.

02 SKILLS

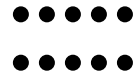

CSS3

JavaScript

HTML5

PHP

03 EXPERIENCE

Nov 2024

Bogor

Google Devfest

On November 9, 2024, in Bogor, Indonesia, a significant event called DevFest took place. Organized by the Google Developer Group (GDG), DevFest is a series of seminars and workshops designed to connect and inspire developers across various cities around the world. With GDG chapters spread throughout the country, DevFest provides a valuable opportunity for local developers to come together, network, and learn about the latest technologies and trends.
